BACKGROUND MUSIC SERVICE PROVIDERS

Jukebox service

For dubbing and using of phonograms in jukebox services in Finland.

A jukebox refers to a device through the use of which a customer him/herself may, subject to payment, select a phonogram.

Remuneration

Tariff payable is determined on the basis of the total number of locations operated by the background music operator and the gross income that the operator charges for its service.

Tariff:

Number of locations	% of gross income per location / month	Minimum €/ location / month
1 - 200	14,5	21,20
201 - 500	12,5	20,29
501 - 1100	10,0	18,13
1101 -	7,75	16,08

Applicable VAT (value-added tax) shall be added to the prices.

Locations refers to premises administered by the operator's customer. Separate premises, which are located at the same location, and where distinctive music (different music zones) is performed, shall be regarded as independent and separately invoiced locations.

Gross income refers to the monthly VAT-excluded (coin-)revenue generated by jukeboxes or another compensation invoiced by the operator for the providing of jukebox services. Should this other compensation be greater than the (coin-)revenue, remuneration shall be calculated on the basis of that compensation.

Reporting and invoicing:

Details on gross income and the number of locations shall be provided monthly and in accordance with separate reporting instructions. Remuneration shall be invoiced on the basis of submitted reports.

Other terms:

More specific terms governing the activity are included in the Background music service agreement and its appendices.
